Product description

Calcium octadecanoate
Calcium distearate
E 470a

Calcium stearate is the calcium salt of stearic acid. Calcium stearate is a white and odorless powder. The lubricating properties of calcium stearate turn the substance into an appropriate lubricant for the production of tablets or granules. Calcium stearate can be obtained from fats from both animal and vegetable origin.

Calcium stearate is used in the areas of areas of pharmaceuticals, foods and food supplements.
