Product description

C₆H₅Na₃O₇
E 331 (iii)
Trisodium citrate

Sodium citrate is a colorless or white salt of citric acid and can be obtained through the neutralization of a sodium hydroxide solution with citric acid. Sodium citrate is odorless and easily soluble in water.

Sodium citrate may be used, amongst other things, as a sequestrant, emulsion stabilizer and acidity regulator.

Sodium citrate is used in the areas of foods, food supplements and pharmaceuticals.
